#### WHY HE WOULDN'T WORK

He Remembered the Advice Given to Brother Zebby.

His Family Had Been Washed Down the Creek, But He Didn't Worry—Tells How Zeb Went Up the Hill "Bookery, Bookery."

C. F. W. H. 1889.  
W. J. Hoglin, an adventurous Eastern capitalist, recently bought a large tract of timber land lying near the Indian Territory. Mr. Hoglin set up a saw-mill, which was easy enough, but when he attempted to operate the mill he was confronted by a difficulty which he had not anticipated. He could not secure the necessary help. The neighboring people, either squatters in the original or very close imitations, exhibited no interest in the enterprise. They would sit about, lazily watching the work, but when asked to help load logs or in any way assist the head sawyer, they would slouch away or drawlingly make excuses.

ASKING FOR DIRECTION.  
"You air rakin' up the sand in the mill's spring of truth now, mister. My brother Zeb was a mighty hand to work. Why, he was so fond of work that he used to chop wood while he was resting. I declared once that he would like to be sent to the penitentiary so he could get as much work as he wanted to do. Pap begged him an' mam begged him not to work so hard, but he didn't pay no attention to them, but kept on working an' a-workin' till suthin' happened."

"What happened?" the saw-mill man asked.  
"Well, he got up one mornin' feelin' suthin' break an' went out to chop down a six-foot tree befo' breakfast. Pap begged him an' mam begged him not to go, but he went."

"What happened to him?"  
"Well, he went up to the tree, he did, an' cut down the bushes so his axe would have a fair swing, an' then he lit into the tree, an' about the time the chips commenced to fly, here come pap an' mam, an' pap begged him an' mam begged him, but the chips kept on flyin', an' pap an' mam went back to the house. After while suthin' come down the hill, bookery, bookery, but the chips flew so fast that brother Zeb didn't hear the thing that come down the hill, bookery, bookery, till all at once—"

Here the narrator ceased speaking. He stroked his chin, yellow whiskers, took a fresh cher of "long green" tobacco, "wallowed" it about in his mouth, and then fixed his gaze on some thing far down in the valley.  
"Well," said the Eastern man.  
"Yes, very well; I'm blest to say, I felt a little sorter jittery, but I'm no pecker to-day."  
"But what about your brother?"  
"Who, brother Zeb?"  
"Yes, of course."  
"Well, thing come down the hill, bookery, bookery, but the first thing Zeb thought of was how big a mistake he made in not payin' attention when pap begged him an' mam begged him."  
"But what was the thing that came down the hill?"  
"The thing that come down bookery, bookery."  
"Yes."  
"A wild hog."  
"What did it do?"  
"Well, back up the hill, bookery, bookery."  
"What became of your brother?"  
"Went up the hill with him, bookery, bookery, an' we never have seed him since. That showed me that it wasn't do for a man to be so fond of work. Well, I reckon I'd better sator on now an' look after my family. Good bye. He slouched away, with his hands deep in the pockets of his brown jeans, whistling a tune of lary contentment.  
Several days later, Mr. Hoglin, while riding through the wilderness of his extensive domain, lost his bearings and while wandering around aimlessly in the woods, came upon an old fellow sitting beside the fork of a low tree.  
"Why, how are you?" called the mill man.  
"Sarter slow."  
"I had quite a talk with you the other day, I believe."  
"So do I."  
"Have you found your family?"  
"Yes, most of 'em. Bill an' Sam an' Jake an' Matt an' Patsy an' Sue, an' Bob an' Lisa an' Tobe air still missin', but I reckon they'll turn up all right."  
"I must say that you are the most peculiar being I ever saw."  
"Yes, so is a whole."

#### SLICING TO DEATH.

Barbaric Method of Torturing Condemned Murderers in China.

At the back of this execution ground stood half a dozen wooden crosses. If you will take a piece of telegraph pole eight feet long and set a similar pole five feet long into it at right angles two feet from the top, you will have the Chinese cross. It is upon these crosses that the criminals are bound when they are to undergo the punishment of Ling Chi or slicing to death, which is a barbaric method of torturing condemned murderers in China.

It worked first rate.  
"Why are you sitting up there straddling that fork?" the mill man asked, after a short silence.  
"Well, I sator over a mighty fine horse an' he died, an' now when I git to thinkin' about him I jest batter set straddling on 'em."

"By the way, I haven't any time to spare however much inclined I might be to listen to your strange experiences. I am lost—don't know the way back to the mill. Shall I take the road?"  
"Yes."  
"Thank you," said the Eastern man, gathering up his bridle reins.  
"Not a word," the squatter answered. "The mill man rode away, and about two hours later he came upon an old fellow sitting under a tree.  
"Why, here you are again," said Mr. Hoglin. "How did you get away over here?"  
"Didn't. Ain't stirred sense you left 'cept to climb down outen this tree."  
"Look here, you told me to take this road and—"

"Didn't tell you to take it. You asked if you could not, I said yes. Allus like to be consideratin' you know."  
"I do not thank you for your accommodation, I assure you. I tell you that I am looking for my mill and—"

"I look here, I'm losing patience with you."  
"That's bad. Fast you lost yo' mill an' now you air losin' yo' patience. Why you kaint keep nothin', ken you?"  
"I do not wish to bandy words with you. Where is that mill?"  
"Right down thar in the hollow about two hundred yards from here."  
"Why didn't you tell me at first, you—"

#### SHOULD COUSINS WED.

Prominent Physicians Declare Inter-Marriages to be Wiser.

The widespread prejudice against consanguineous unions is exceedingly stubborn, but certain writers of to-day, including Haeckel, have endeavored to show that it rests upon no well-authenticated facts. They claim that the misshapen and imperfect offspring of such marriages is due not to the union of like blood, but of like physical and mental tendencies. Consanguinity itself, they say, plays no particular role in the union of individuals of the same stock, but it increases in the descendants the tendencies common to the two progenitors. If these tendencies be good they will be intensified in the child, and hence the union will be advantageous. If they be bad a reinforcement of unfavorable tendencies should be suppressed by the avoidance of such marriages.

Yet there are on record numerous cases of blindness, deafness and deformity in the children of nearly related parents. Sterility sometimes results, or if children are born they may be puny, feeble and spiritless or with a tendency to idleness. A prominent physician has compiled statistics that show that out of 14,367 births nearly 13 per cent. were children of cousins. The percentage of deaf and dumb children born of parents related by blood is only a trifle less, and out of 7,978 blind persons he has found that 8 per cent. can trace their defect to a consanguineous union. Insane mania is a much less frequent result of such unions, as out of nearly 15,000 cases examined he finds less than 2 per cent. due to that cause. Among the inmates of a blind asylum several years ago were five children of one marriage of cousins, all born sightless.

Epilepsy, tuberculosis and consumption are effects not uncommon, and instances are on record of the propagation of almost every known form of disease through this medium. Nor is it unusual for two or more forms of disease to be allied in one child. In late years a girl was admitted to the Pennsylvania Institution for Deaf and Dumb, who, in addition to being stone deaf and speechless, was horribly deformed. Inquiry elicited the fact that the father and mother were cousins.

A physician who had made a close study of the subject said that he had often observed in the cases of offspring of consanguineous unions where actual disease was absent a tendency to awkwardness and dullness. Children were apt to be underbred, with fat, stubby, short-fingered hands and ill-developed limbs. Though children with fine forms and brilliant intellects often followed these marriages he believed they were exceptional, and that the marriage of cousins was fraught with great danger. Their offspring was liable to be endowed with mental, physical and moral deformity.

"The best evidence of the evil effects of the intermarriage of kin," said a leading gynecologist, "is to be had by a glance at the royal families of Europe. One can not doubt that there is a tendency to deterioration when he considers the unfortunate house of Hapsburg and remembers that the King of Bavaria is in a mad house, that the present Emperor of Germany is a victim to tuberculosis, and that his father's disease was due in part to the poison of the intermixed blood of the Hohenzollerns. Sickly and imbecile Princes have for centuries borne witness to the danger that lies in the union of cousins. A careful observer of animals will note the same tendency to degeneracy. The lion and the lioness at the Zoo have repeatedly borne clove-tongued cubs. Not one of their numerous progeny have been exempt from this defect, and I feel confident that the parent lions are brother and sister, and that in that fact lies the cause of the invariably imperfect offspring."

#### Stanley's Love Affair.

Henry M. Stanley, the explorer, had an early love affair at Omaha, Neb., the particulars of which have been recently given out on "undoubted authority."

It was when he was young, handsome and fond of adventure. He fell in love with an actress who was then on the boards of the old Academy of Music—a vaudeville actress. She was a coquette, and flirted with young bloods of the city who had more money than Stanley. When Stanley got perfectly crazy in his affection for her she arranged a meeting with him after the performance, and, posting her friends, had them stationed behind the scenes to observe the results. Stanley, honest in his infatuation, knelt before the woman and protested desperately. She amused herself at his expense for some time, and then called in her concealed friends, much to her lover's surprise and disgust.—N. Y. Graphic.

Hudson, Dec. 16, 1889.  
Wm. Radam Microbe Killer Co.:  
Dear Sirs:—Having tried every suggested remedy for chronic rheumatism for more than twenty years, I was dubious as to the efficacy of your Microbe Killer. But am frank to admit a cure after taking not quite two jugs, and I earnestly trust permanently. Yours respectfully,  
S. O. LANCY.

To Nervous Men.  
If you will send us your address, we will mail you our illustrated pamphlet explaining all about Dr. Dye's Celebrated Electro-Voltaic Belt and Appliances, and their charming effects upon the nervous debilitated system, and how they will quickly restore you to vigor, manhood and health. If you are thus afflicted, we will send you a Belt and Appliances on trial.  
VOLTAIC BELT CO., Marshall, Mich.

Hudson, Dec. 14, 1889.  
Mr. Wm. Radam:  
I write this to certify that I have taken your "Microbe Killer," and have derived much benefit from it.  
I consider it an excellent remedy for General debility. Yours respectfully,  
R. A. GUERNSEY.

By special permission we refer to Mr. Matthew Griffin, editor and proprietor of the well known financial paper, "The Daily Stockholder," 176 Broadway, New York, who was cured of the rheumatism by the use of our remedy, and is continually recommending it to his friends.  
For sale by Buckner Leavell, agent.

It is a powerful antistreptococcal, and is especially adapted for the cure of all diseases of the streptococcus, such as Syphilis, Gonorrhea, and all other disorders. It is a powerful antitubercular, and is especially adapted for the cure of all diseases of the tuberculosis, such as Syphilis, Gonorrhea, and all other disorders. It is a powerful antileprosy, and is especially adapted for the cure of all diseases of the leprosy, such as Syphilis, Gonorrhea, and all other disorders. It is a powerful antisyphilitic, and is especially adapted for the cure of all diseases of the syphilis, such as Syphilis, Gonorrhea, and all other disorders. It is a powerful antigonorrheal, and is especially adapted for the cure of all diseases of the gonorrhea, such as Syphilis, Gonorrhea, and all other disorders. It is a powerful antistaphylococcal, and is especially adapted for the cure of all diseases of the staphylococcus, such as Syphilis, Gonorrhea, and all other disorders. It is a powerful antistreptococcal, and is especially adapted for the cure of all diseases of the streptococcus, such as Syphilis, Gonorrhea, and all other disorders. It is a powerful antitubercular, and is especially adapted for the cure of all diseases of the tuberculosis, such as Syphilis, Gonorrhea, and all other disorders. It is a powerful antileprosy, and is especially adapted for the cure of all diseases of the leprosy, such as Syphilis, Gonorrhea, and all other disorders. It is a powerful antisyphilitic, and is especially adapted for the cure of all diseases of the syphilis, such as Syphilis, Gonorrhea, and all other disorders. It is a powerful antigonorrheal, and is especially adapted for the cure of all diseases of the gonorrhea, such as Syphilis, Gonorrhea, and all other disorders. It is a powerful antistaphylococcal, and is especially adapted for the cure of all diseases of the staphylococcus, such as Syphilis, Gonorrhea, and all other disorders. It is a powerful antistreptococcal, and is especially adapted for the cure of all diseases of the streptococcus, such as Syphilis, Gonorrhea, and all other disorders. It is a powerful antitubercular, and is especially adapted for the cure of all diseases of the tuberculosis, such as Syphilis, Gonorrhea, and all other disorders. It is a powerful antileprosy, and is especially adapted for the cure of all diseases of the leprosy, such as Syphilis, Gonorrhea, and all other disorders. It is a powerful antisyphilitic, and is especially adapted for the cure of all diseases of the syphilis, such as Syphilis, Gonorrhea, and all other disorders. It is a powerful antigonorrheal, and is especially adapted for the cure of all diseases of the gonorrhea, such as Syphilis, Gonorrhea, and all other disorders. It is a powerful antistaphylococcal, and is especially adapted for the cure of all diseases of the staphylococcus, such as Syphilis, Gonorrhea, and all other disorders. It is a powerful antistreptococcal, and is especially adapted for the cure of all diseases of the streptococcus, such as Syphilis, Gonorrhea, and all other disorders. It is a powerful antitubercular, and is especially adapted for the cure of all diseases of the tuberculosis, such as Syphilis, Gonorrhea, and all other disorders. It is a powerful antileprosy, and is especially adapted for the cure of all diseases of the leprosy, such as Syphilis, Gonorrhea, and all other disorders. It is a powerful antisyphilitic, and is especially adapted for the cure of all diseases of the syphilis, such as Syphilis, Gonorrhea, and all other disorders. It is a powerful antigonorrheal, and is especially adapted for the cure of all diseases of the gonorrhea, such as Syphilis, Gonorrhea, and all other disorders. It is a powerful antistaphylococcal, and is especially adapted for the cure of all diseases of the staphylococcus, such as Syphilis, Gonorrhea, and all other disorders. It is a powerful antistreptococcal, and is especially adapted for the cure of all diseases of the streptococcus, such as Syphilis, Gonorrhea, and all other disorders. It is a powerful antitubercular, and is especially adapted for the cure of all diseases of the tuberculosis, such as Syphilis, Gonorrhea, and all other disorders. It is a powerful antileprosy, and is especially adapted for the cure of all diseases of the leprosy, such as Syphilis, Gonorrhea, and all other disorders. It is a powerful antisyphilitic, and is especially adapted for the cure of all diseases of the syphilis, such as Syphilis, Gonorrhea, and all other disorders. It is a powerful antigonorrheal, and is especially adapted for the cure of all diseases of the gonorrhea, such as Syphilis, Gonorrhea, and all other disorders. It is a powerful antistaphylococcal, and is especially adapted for the cure of all diseases of the staphylococcus, such as Syphilis, Gonorrhea, and all other disorders. It is a powerful antistreptococcal, and is especially adapted for the cure of all diseases of the streptococcus, such as Syphilis, Gonorrhea, and all other disorders. It is a powerful antitubercular, and is especially adapted for the cure of all diseases of the tuberculosis, such as Syphilis, Gonorrhea, and all other disorders. It is a powerful antileprosy, and is especially adapted for the cure of all diseases of the leprosy, such as Syphilis, Gonorrhea, and all other disorders. It is a powerful antisyphilitic, and is especially adapted for the cure of all diseases of the syphilis, such as Syphilis, Gonorrhea, and all other disorders. It is a powerful antigonorrheal, and is especially adapted for the cure of all diseases of the gonorrhea, such as Syphilis, Gonorrhea, and all other disorders. It is a powerful antistaphylococcal, and is especially adapted for the cure of all diseases of the staphylococcus, such as Syphilis, Gonorrhea, and all other disorders. It is a powerful antistreptococcal, and is especially adapted for the cure of all diseases of the streptococcus, such as Syphilis, Gonorrhea, and all other disorders. It is a powerful antitubercular, and is especially adapted for the cure of all diseases of the tuberculosis, such as Syphilis, Gonorrhea, and all other disorders. It is a powerful antileprosy, and is especially adapted for the cure of all diseases of the leprosy, such as Syphilis, Gonorrhea, and all other disorders. It is a powerful antisyphilitic, and is especially adapted for the cure of all diseases of the syphilis, such as Syphilis, Gonorrhea, and all other disorders. It is a powerful antigonorrheal, and is especially adapted for the cure of all diseases of the gonorrhea, such as Syphilis, Gonorrhea, and all other disorders. It is a powerful antistaphylococcal, and is especially adapted for the cure of all diseases of the staphylococcus, such as Syphilis, Gonorrhea, and all other disorders. It is a powerful antistreptococcal, and is especially adapted for the cure of all diseases of the streptococcus, such as Syphilis, Gonorrhea, and all other disorders. It is a powerful antitubercular, and is especially adapted for the cure of all diseases of the tuberculosis, such as Syphilis, Gonorrhea, and all other disorders. It is a powerful antileprosy, and is especially adapted for the cure of all diseases of the leprosy, such as Syphilis, Gonorrhea, and all other disorders. It is a powerful antisyphilitic, and is especially adapted for the cure of all diseases of the syphilis, such as Syphilis, Gonorrhea, and all other disorders. It is a powerful antigonorrheal, and is especially adapted for the cure of all diseases of the gonorrhea, such as Syphilis, Gonorrhea, and all other disorders. It is a powerful antistaphylococcal, and is especially adapted for the cure of all diseases of the staphylococcus, such as Syphilis, Gonorrhea, and all other disorders. It is a powerful antistreptococcal, and is especially adapted for the cure of all diseases of the streptococcus, such as Syphilis, Gonorrhea, and all other disorders. It is a powerful antitubercular, and is especially adapted for the cure of all diseases of the tuberculosis, such as Syphilis, Gonorrhea, and all other disorders. It is a powerful antileprosy, and is especially adapted for the cure of all diseases of the leprosy, such as Syphilis, Gonorrhea, and all other disorders. It is a powerful antisyphilitic, and is especially adapted for the cure of all diseases of the syphilis, such as Syphilis, Gonorrhea, and all other disorders. It is a powerful antigonorrheal, and is especially adapted for the cure of all diseases of the gonorrhea, such as Syphilis, Gonorrhea, and all other disorders. It is a powerful antistaphylococcal, and is especially adapted for the cure of all diseases of the staphylococcus, such as Syphilis, Gonorrhea, and all other disorders. It is a powerful antistreptococcal, and is especially adapted for the cure of all diseases of the strept
